Design of the FAO/MAAIF Intervention System/Database

The system is derived from the "information sheets" whose development was a joint effort undertaken by all stakeholders. The system will be cloud-based i.e it will be accessible through a web browser by visiting a URL e.g <u>https://nsyea.ensibuuko.com/</u> and will further be complimented by a mobile app to enable the capture/entry of data.

At a high level, the system will operate as follows;

- On the Web System: An Administrator (Ensibuuko) will create user accounts.
 User accounts are what will permit the other stakeholders access the system
- 2. On the Web System: UNFFE will then create the interventions
- 3. On the Web System: UNFFE will create Data Entrant accounts for the data entrants
- 4. On the Mobile App: The **Data Entrant** will then use a tablet to access the system and enter data for the beneficiaries.

Interface 1: Accessing the web system

On visiting the selected URL (e.g <u>https://nsyea.ensibuuko.com/</u>) through a web browser, the user will access this interface

Interface 2: Logging in

User accounts will be created by the administrator however to login, click login in the top-right

NSYEA		Login
	Signup with Google	
	LOGIN MAAIF 💥 Sida 😒 enstauko	

Interface 3: Dashboard

Different user-types will have different dashboards however the UNFFE dashboard will appear as shown below;

.	Search Project	Perez Kawumi 📑
Perez Kawumi Director Training, UNFFE	Dashboard	
Dashboard Interventions Data Entrants	A Interventions	25 Data Collected 108
Add Intervention	Sex Distribution	Age Distribution All Female Male Intervention ~
	0	14-17 7% 18-24 46% 25-34 32% 35-44 9% 45-54 4% 55-64 1%
	Female Male	65+ 1%

Interface 4: UNFFE creates an intervention

UNFFE will create an intervention by clicking the "Add Intervention" button

Which will launch the following interface ...
